# TONOPAH DAILY BONANZA

Today's Silver  
Quotation 52 1-2

VOL. IX. NO 130

TONOPAH, NEVADA, SATURDAY EVENING, MARCH 25, 1911.

PRICE 10 CENTS.

## MUCH ACTIVITY IN TONOPAH'S FAMOUS MINES

### TONOPAH MEN DEPART FOR OLD ENGLAND

KELLY BROTHERS MAY RETURN  
TO U. S. WITH CORNISH  
BRIDES.

Fred and Jim Kelly who, together with their brother Albert, are the proprietors of the Belmont bar, on Main street, departed this morning for Penzance, Cornwall, England, ostensibly to pay a visit to their parents, who are both living, hale and hearty, and are upwards of 70 years of age. Rumor, however, has it that the Kelly boys are journeying to the old country to return with buxom lassies to the land of their adoption. This rumor may be incorrect, but when asked the question point blank, Brother Albert simply winked knowingly.

The Kelly brothers are among the oldest of the inhabitants of Tonopah, having lighted here during the days of Jim Butler, many years ago. All have made several trips to the native heath to visit the "old folks at home." This time, however, Albert, who has his wife and family in Tonopah, stays behind to take care of the business interests of the three brothers. Several months will elapse before the return of the wanderers to Tonopah.

### E. A. FRITSCH IS DISMISSED BY JUDGE

The suit brought by the Tonopah Sewer and Drainage company against A. E. Fritsch, proprietor of the A-B-C saloon, was dismissed today by Judge H. H. Atkinson. One of the witnesses called by the prosecution admitted that he had pulled the sack in the sewer company's pipe while in the employ of Fritsch; however, the question as to whether he did so under instructions or of his own violation was the point on which the decision mingled. It now looks as though a corporation has no legal status in this man's town of Tonopah.

### FORMER TONOPAH WOMAN IS DEAD AT MANHATTAN

Mrs. May Young, for many years a resident of Tonopah, died at Manhattan early this morning. Mrs. Young came to this section of Nevada from New York state in the early days, and was well known around the early camp and the latter city. She has a sister residing in Denver, Colorado.

### TONOPAH NEWS COMPANY IS UP-TO-DATE CONCERN

The Tonopah News and Stationery company is now moved to its new quarters just below the new post-office and has put in a fine new line of goods. The best of candies, a complete line of sporting goods and magazines, newspapers and books of every description. A visit to this store is well worth the time, as there is undoubtedly some article carried in stock that is needed by everyone.

### CARRIE NATION IS IN SERIOUS PLIGHT

LEAVENWORTH, Kan., March 25.—Mrs. Carrie Nation, the militant Kansas temperance worker, who is at a sanitarium here, is gradually growing weaker. Her condition, which is due to a general breakdown, is regarded as serious. None of her mail is given her, but is forwarded to a daughter in Kansas City, who is managing her mother's business affairs.

### CASINO TONIGHT.

Remember the Harem Skirt dance tonight. Don't fail to see Agnes in "The Gibson Girl" act or the pictures which will be shown every hour.

### HUBERT GUTHRIE PASSES AWAY OF PNEUMONIA

Hubert Guthrie passed away at the Miners' hospital at 8:30 o'clock last night after a few days' illness with pneumonia. The dead man was but 19 years of age and was one of the best-liked youths of his age in the entire city of Tonopah. The father of young Guthrie arrived in Tonopah from Hazen yesterday afternoon in time to be at the bedside of his dying boy. Besides the father, Mr. Guthrie is survived by a mother and young sister. Funeral services will be held from the Presbyterian church at 2 o'clock tomorrow afternoon, under the auspices of the Miners' union.

### LEAVE ON HONEYMOON.

Justice Lee Davis united in marriage yesterday afternoon Henry Barrett of Millers, Nev., and Mrs. Orpha Reynolds of Detroit, Mich., at his office in the city hall. The newly married couple left last night on a honeymoon trip to Provo, Utah.—Reno Journal.

### VOLUNTEERS MASS MEETING FOR MONDAY

BOYS ARE ANXIOUS FOR BUSINESS TO SHOW INTEREST.

A mass meeting of the volunteer fire department is called for 8 o'clock Monday evening in the gymnasium and it will be well for all the business men of Tonopah who can possibly spare the time, to be on hand and help devise a way that new interest will be taken in the department.

From past experience the property owners of Tonopah know what the volunteers have done, and can readily realize what may happen should the department have to disband.

The business men who help to compose the volunteer fire department and in whom it rests to elect officers that they can feel confident will take care of the affairs, have been negligent in their duty, and the result is that the department today is without anyone in charge and the affairs gradually shaping to a point where the department must disband.

The holdings of the volunteers are the fully equipped gymnasium and a first-class ball park. These have cost the department about \$10,000, all paid excepting \$321.

This small debt of \$321 can be paid off by the volunteers in a few months if a set of officers are elected who will arouse the old spirit again.

The records show that, with interest taken during last summer, the debt of the department was lowered over \$500 in the course of a couple of months.

If the business men will show the proper interest to be on hand Monday evening the boys will do the rest.

### ORE SHIPMENTS OF PAST WEEK

During the past week 8259 tons of ore was shipped from Tonopah and the surrounding mining section, carrying a total value of \$206,475. The shipments were as follows:

Properties.	Tons.
Tonopah Mining	3500
Belmont	2100
Montana-Tonopah	1035
Tonopah Extension	995
West End	500
MacNamara	50
Midway	80

Fresh milk and cream at Palace Market. 12-12-tf

### Weekly Report From All the Properties of Tonopah Shows the Vast Progress Being Made, Tonnage Handled and Values Realized.

In the erection of new machinery, in the footage made and in values, the past week is one that might well bear the caption of "banner" in the mining history of Tonopah and vicinity. Considerable machinery has been placed, or is still being placed, in several of the smaller mines which will be running full blast within the near future. All of this machinery is of the most approved model and will tend towards the upbuilding of the mining property of this section.

### Belmont

During the week the machinery which comprises the timber framer and mill has been moved from the Desert Queen shaft to the new Belmont shaft and is now in active and successful operation. The ore sorting belts have also been brought to the new shaft and placed in position and a force of men put to work sorting ore. Only one shift is at present employed, but another one will be put to work in the immediate future.

When running up to capacity for two shifts the ore sorting plant keeps about 24 or more men on the jump, so with the other men who are employed in various occupations about the surface of the Belmont the company keeps a small army of laborers engaged in service above ground. With these and with the number employed in the mine's underground workings the company now sustains a pay-roll reaching pretty close to the 300 mark. And when is added the number that is employed at the mill at Millers, it is at once apparent what a potent factor the Belmont company is to the wage-earners of the State.

At the company's new shaft everything is now running in splendid shape and the cages are constantly employed in the hoisting of ore. The last week 2100 tons of ore were raised, the largest amount that has been taken from the mine since before the disaster of a month ago, and 500 tons more than was hoisted at the last report.

In the mine nothing of a startling or sensational character has developed during the week. The ore is maintaining its uniform width and value, though the high-grade streaks heretofore noted come and go as usual and add very materially to the company's revenue.

On the main ledge on the 900-foot level the hanging-wall drift is proceeding through 5 feet of ore of a splendid milling grade, while the stopes above are furnishing a small amount of smelting ore in addition to their usual quota of a milling character.

1000-foot level.—The east drift on the hanging-wall branch of the vein at this level shows 5 feet of quartz in the face, though here and there small bunches of waste material are encountered, but though this contains little or no value the whole mass is broken down and shipped to the mill. The drift is now at a point which corresponds vertically with the low-grade stuff which appeared on the 1100 level, but which, when it was passed through, led to considerably higher values, so by the same token it is likely that when the face on the 1000 is driven a few feet to the east the values will materially increase.

From the stopes on this level the usual tonnage is being secured and it is keeping up to standard as far as values are concerned. At the 1056 winze on this level, at the bottom of which the late disastrous fire occurred, a new hoist and motor of 50 h. p. has been installed. It was at first believed that the hoist which went through the flames could by a little repairing be again utilized, but examination proved it to be in bad shape, so it was deemed expedient to install a new one. The winze at this point and clear down to the 1166 has been retimbered, and it is now in as good shape as ever.

1100-foot level.—The face of the east drift on this level shows 5 feet of low-grade ore—that is, low for the Belmont—but it is not so devoid of values that it fails to make a good milling product. The stopes above the level, both to the east and west

of the new Belmont shaft, continue in a splendid grade of ore and are supplying their customary tonnage. Work still continues in the crosscuts that are being sent out from this level, but there has been no change of note.

1166-foot level.—The drift on the hanging-wall branch of the vein is being driven to the east on this level and shows a 5-foot face of excellent ore. The stopes above the level are producing a small tonnage, but it is of splendid grade and adds very materially to the product of the mine.

The new shaft has now reached a depth 130 feet below the 1100-foot station, and is making at the rate of about 4 feet per day. Below the 1100, except for the manway, the shaft is bulkheaded and will be kept so until a station is established at the 1200. This will be done in the next few weeks and connection made with the 1166 level, thereby facilitating the method of drawing ore from that section of the mine.

### Tonopah-Mining

With a full force of miners at work and no loss of time occasioned by breaks in the power line, as was noted last week and which caused a cessation of operations for nearly three days, the Tonopah Mining Co. was permitted the past week to bring production up to the usual maximum and the report from the mill shows that the output compares very favorably with any that has been made the current year.

In the several mines of the company's estate the number of feet of development reached the standard that has been maintained the past few months, and more than doubled that of the previous week. In all 452 feet of work was accomplished, divided as follows: Mizpah 196 feet, Red Plume 61½ feet, Silver Top 204½ feet. Probably in the three working mines the best showing for the week was made in the Silver Top, where, on the 440-foot level, a decided improvement has been noticed in the size of the veins and the quality of the ore. It will also be noted from the mine's report that the faulted section of the Desert Queen vein has been caught up with, and at the point of connection, on the hanging-wall of the fault, a foot of good milling ore has been encountered. Drifting is now being pushed on this ore and favorable results are anticipated.

In all the company's mines the usual amount of stopping obtains, and in almost all of the new workings there is every evidence that the veins are growing stronger and that they are becoming more productive. This fact is especially noticeable on the 300 of the Mizpah, where work is being vigorously pushed on the Burro vein, and at this point it shows better and stronger in every respect.

On the Red Plume, between the 600- and 700-foot levels, an intermediate level has been established, and from this stopes will be started. The vein at this point shows considerable space between the walls and the ore is of an excellent grade.

The report from the mill for the week ending March 20 shows that 98 out of the 100 stamps were dropping constantly, crushing 3400 tons of ore of an average of \$20.50 per ton. The shipment of bullion consisted of 48 bars, valued at \$42,000, and 31 tons of concentrates, valued at \$18,000, making the total shipments for the week amount to \$60,000. An extraction of 91 per cent was recorded. The amount of ore received at the mill from the mine for the week totaled 3500 tons.

The diamond drill is still operating on the west end of the Red Plume, but no announcement has yet been made of what is being accomplished.

### Tonopah Extension

Eleven bars—weight 1400 pounds, and having an approximate value of \$14,700—was the result of the Tonopah Extension's clean-up for the first half of the month of March. (Continued on Page Three.)

### MANHATTAN BIG FOUR IS A BIG PRODUCER

P. O. (Slim) Harris of Manhattan is in Tonopah for a few days and is telling of the rich developments in the Pine Tree camp. Mr. Harris was one of the original locators in Manhattan and has seen Manhattan in the days of prosperity and adversity. He stated to a Bonanza scribe that on the Big Four lease operated by Poak-Chapman-Steen lease at the 200-foot level a four-foot ledge of \$70 ore is being mined and at the present time 200 tons of the ore is on the dump ready for milling. The shaft is now down 300 feet, and from which point a crosscut will be run to cut this high value of ore on the 200-foot level above. Mr. Harris' opinion of Manhattan on mining is valued by all mining investors, and he says Manhattan, with new capital, will make good and that the Pine Tree camp, inside of a year, will be producing over a million dollars a year. Mr. Harris returns to Manhattan tomorrow.

### ESPEE ROAD WILL ALLOW STOPS IN NEVADA

SOUTHERN PACIFIC TO GRANT  
FIVE-DAY STOPOVERS TO  
HOMESEEKERS.

RENO, Nev., March 25.—The annual migration of homeseechers to the coast is now under way and Southern Pacific trains passing through Reno are crowded by those who heed Greeley's advice. The railroad company has made a helpful concession for Nevada by permitting a five-day stopover to the travelers at any point within the state and many are taking advantage of it.

J. M. Fulton, district freight and passenger agent, is doing good work for Nevada by distributing the handsome booklets of the company on irrigation and farming in the west to passengers who go through the state.

John A. Gill, traveling freight and passenger agent, is also an apostle to the homeseechers, giving glowing descriptions of our resources.

This movement of thousands of farmers from the worked-out middle west agricultural region will continue until the middle of April. Tickets one way will be sold until April 10 in the east and there is a movement on foot in this state to make a bid for settlers.

From Reno a stopover traveler might visit Mason valley, Carson valley and Minden easily. From Hazen he could take a trip through Fallon and the Truckee-Carson district. If the cities could have a little booklet of their own to put on the train a few stations ahead or at Ogden the trainmen would doubtless see they were distributed in time.

Tonopah could well afford to get busy along this line and make an effort to bring to this section some of the many homeseechers who are now wending their way west. The Reno stopover privilege would allow of a visit to this section and there is considerable land in the vicinity of Millers that could be taken up by homeseechers. Now is the time for action and a booklet on the order of those suggested above would prove of great benefit to this section.

### CASINO TONIGHT.

Remember the Harem Skirt dance tonight. Don't fail to see Agnes in "The Gibson Girl" act or the pictures which will be shown every hour.

Fresh milk and cream at Palace Market. 12-12-tf

The Daily Bonanza reaches the people.

### SUPT. LOWE RESIGNS AT LIBERTY MINE

C. R. OLSEN APPOINTED IN  
CHARGE OF TONOPAH  
LIBERTY.

Superintendent A. E. Lowe of the Tonopah-Liberty mine of Liberty has tendered his resignation, and C. R. Olsen is said to have been appointed his successor. Just what Mr. Lowe intends to do is not as yet known. Rumor has it that he will remain in this section and become affiliated with some other mine. Mr. Lowe himself, however, refuses to give out any of his plans at the present time.

### PRESBYTERIAN CHURCH.

Sunday services at the Presbyterian church, St. Patrick street. Rev. Herman L. Burnham, minister, as follows: Evening service at 7:45, subject: "Salvation the Only Cure for Sin." This is the third in the Sunday evening sermons for Lent. Good singing by the congregation and special selections by male quartet. Bible school at 9:45 a. m., W. L. Malone, superintendent. Morning preaching service at 11 a. m. Young People's meeting at 6:45 p. m. A cordial welcome to all is extended to all the services of the church. "Come with us and we will do thee good."

### GOOD BILL AT THE BUTLER IS THE PROMISE

VAUDEVILLE TEAM WILL MAKE  
ENTIRE CHANGE FOR THE  
SUNDAY SHOWS.

One of the best programs of the season will be shown at the Butler this evening. "The Alvis" will appear in their clever up-to-date vaudeville sketch, having an entire change for Sunday afternoon and evening. "A Cowboy's Devotion," "Carmensita the Faithful" and a splendid Vitagraph drama, entitled "The League of Mercy." Tomorrow's program is as follows: "Max Has the Boxing Fever," (comedy); "An Imitator of Blondin," (comedy); "The Ransom of Red Chief," (Indian story), and "The New Stenographer," (Vitagraph comedy.)

### PERSONAL MENTION

L. R. Andrews is a guest at the Mizpah.

O. U. Pryce of Goldfield is a Mizpah guest.

Harry Leight of Kansas City is a Tonopah visitor.

Charles A. Smith of Liberty is in Tonopah to spend Sunday.

C. L. Milward of Rhyolite is a Tonopah visitor. He is stopping at the Mizpah.

A. E. Lowe is a Tonopah visitor from Liberty. He is registered at the Mizpah.

H. L. Keely of New York, representative of the Mining and Engineering Journal, returned yesterday from Liberty.

Judge Mark R. Averill left this morning for Reno. He is billed to return to Tonopah by April 3.

B. M. Bateman, formerly employed at the West End mine, has returned from a pleasure trip through California.

Judge J. S. Orr of Reno will arrive in Tonopah in the morning and will hear several cases during the next few days.

Remember the Harem Skirt dance tonight. Don't fail to see Agnes in "The Gibson Girl" act or the pictures which will be shown every hour.

Did you try the merchants' lunch at the Frisco Cafe? 35c. 2-7-tf
